Update: The Status of Research in CFAES
Gary Pierzynski, Associate Dean for Research & Graduate Education

I hope this message finds you and your families well, and your research activities in recovery mode. Since the pandemic continues to affect us in many ways, I will continue to provide updates via this monthly message. We are currently in Stage 4 of the research reopening process (https://research.osu.edu/news-events/coronavirus-and-your-research-program/staged-approach-to-returning-to-on-campus-research/) with Stage 5 set to begin on August 3, although we continue at 25% density instead of the planned increases due to the prevalence of COVID-19 infections in Ohio. The need for requesting exemptions for field, greenhouse, and animal research continues (https://cfaes.osu.edu/faculty-staff-resources/return-offices-and-campuses) as does the need for department chairs to coordinate activities for Stages 3-5. The staff for the offices of Research and Graduate Education, including the Grant Development Support Unit, in both Columbus and Wooster will continue telework into the fall semester to help reduce the number of people in our buildings. Please feel free to call, email, or use our website to ask questions or request services (https://research.cfaes.ohio-state.edu).

In the past month we have had some challenges that affect our international graduate students, those currently present and those planning to come to OSU, although at this writing it appears things have worked out. The uncertainty, however, has a chilling effect that will take some time to overcome. On the positive side, hopefully you have had some extra time to work on that backlog of writing assignments and perhaps flesh out some of your research ideas for a proposal. It is not too early to think about how the COVID crisis has identified future research needs in preparation for some potential funding opportunities. There’s no telling what will happen with the economy, but during the recession of 2007-2009 some research funding opportunities actually increased, and some of the COVID relief bills being considered in Washington do provide new funding for research. Overall, we are experiencing many challenges in our research programs and we will get past this as we have many times in the past. Thank you for your efforts.

Funding Opportunities

As funding opportunities are announced we will compile a full list of opportunities on our website. The web page will be updated periodically as new opportunities are discovered.

RADx-rad Initiative

RADx-rad aims to support new, non-traditional approaches that address current gaps in COVID-19 testing or new or non-traditional applications of existing approaches to enhance usability, accessibility, or accuracy.
Deadline: Various through September 2020

North Central Region Sustainable Agriculture (NCR-SARE) Program

A competitive grant program for projects that explore and promote environmentally sound, profitable, and socially responsible food and/or fiber systems with a strong outreach component and significant farmer/rancher or other end-user involvement component.
Deadline: October 8, 2020
What are fringe rates?
In addition to non-cash benefits that employees receive, they also receive fringe benefits which include health plan expenses, pension plan expenses and workman’s compensation expenses, among others. Typically, fringe rates are calculated as a percentage of the salary paid to an employee and is based on his/her job classification.

Why are they important?
When budgeting for personnel on federal grants, OSU is permitted to charge a federally negotiated rate to cover these fringe benefits. Each year, OSU negotiates new fringe rates with the U.S. Department of Health and Human Services. These rates are used to calculate costs for grants, contracts, and other agreements through the Office of Sponsored Programs. Learn More

Updated fringe rates for Sponsored Projects budgeting, FY 2021
Beginning in July, the following rates will be used:

The CFAES Return to Offices and Campuses webpage
The CFAES Return to Offices and Campuses webpage is a central location to find college-specific guidance, links to university resources, and key contacts for support. The webpage has been updated and will continue to be updated as new guidance is released. Please bookmark and visit the page frequently for information and further updates. View Now

CFAES Town Hall and Additional Student Welcome Events
A college town hall will be held for all CFAES faculty, staff and student employees on Wednesday, August 12 from 2-3:30 p.m. The agenda will include updates from Vice President and Dean Kress and her cabinet including time for Q&A. Please submit questions for the Q&A portion by close of business Friday, August 7 using the link below. Zoom Link Password: 546706

NSF Award Terms and Conditions Have Been Revised
All of the terms and conditions have been updated to include a new article which establishes a post-award disclosure requirement for undisclosed current support and in-kind contribution information. Each set of terms and conditions is accompanied by a summary of changes made to that document. The revised terms and conditions will apply to all new NSF awards and funding amendments to existing NSF awards made on or after October 5, 2020, except for the SBIR/STTR-I and SBIR/STTR-II CA-FATC which will become effective July 6, 2020. Useful Flexibilities for Animal Care and Use Programs to Comply with the PHS Policy During the COVID-19 Pandemic

These flexibilities are meant to assure personnel safety and animal welfare while enabling research personnel to prioritize and preserve research efforts. Some of these can be useful in reducing administrative burden, too. Read More

Ohio Grants Partnership

The Office of Budget and Management established and announced the Ohio Grants Partnership to better support local government partners during the COVID-19 pandemic and into the future. The federal supplemental funding of various programs related to coronavirus response and relief created the ideal opportunity to institute this unique grants partnership office. Learn More

New National Science Foundation (NSF) Guidance

The NSF has made updates to the following guidance on their website:
- Frequently Asked Questions (FAQs) on NSF’s Implementation of OMB Memorandum M-20-26 View
- FAQs on Current & Pending Support View
- NSF-approved Formats for the Biographical Sketch website View

Updated guidance includes clarifications on professional appointments, research endeavors, principal investigators working outside the U.S. for an extended period of time, and reporting on in-kind support and outside consulting activities. Please direct any questions to policy@nsf.gov.

Academic Analytics

Academic Analytics is a subscription-based database that enables Ohio State’s departments to obtain discipline-level comparisons of faculty research productivity. If you would like to be credentialed to access Academic Analytics data, please contact Sheila Craft-Morgan. Learn More

Invention reporting and patent protections for grantees
Make your proposal stand out! Contact us today for a Red Team Review

Creating a proposal can be a daunting task, filled with specific acronyms and jargon. Drafting a robust and thorough narrative is a crucial factor to ensure your proposal stands out from the rest, giving you a competitive edge over other proposals.

Color-coded team proposal reviews help to ensure a compliant, compelling proposal response by providing constructive, unbiased feedback to improve overall proposal quality and competitiveness with the goal of getting you funded! We work with your team and involve expert reviewers who can objectively look at your proposal and raise points that members of the proposal team may miss. Reviews are major milestones during proposal development and are an excellent opportunity to make continuous improvements. A Red Team Review will give you a competitive edge during the funder’s panel review process, with the goal of getting your proposal moved into the “FUND” category.

A color-coded team proposal review is not about finding what is wrong; it is about giving you that competitive edge to make the proposal successful! In addition, the Grant Development Support Unit (GDSU) offers blue, pink, and gold level reviews (more information can be found here).

This service was added approximately 1-year ago. Since then, 13 reviews have been conducted – 5 Red Team Reviews and 8 Gold Reviews! Interested in learning more? Contact Shannon Hollis to get started.
